5  
6 IN THE UNITED STATES DISTRICT COURT  
7 FOR THE DISTRICT OF ARIZONA  
8

9 Pointe Educational Services,

10 Plaintiff,

11 v.

12 A.T., et al.,

13 Defendants.  
14

No. CV-13-01918-PHX-NVW

**ORDER**

15 Before the Court are Pointe Educational Services' Motion for Summary Judgment  
16 (Doc. 33), the response (Doc. 40), and the reply (Doc. 42); and Pointe's Motion for Partial  
17 Remand of Certain Issues (Doc. 39), the response (Doc. 45), and the reply (Doc. 46). The  
18 parties also presented oral argument on August 6, 2014. The Court addresses the Motion  
19 for Summary Judgment first and the Motion for Partial Remand second. For the following  
20 reasons, the Motion for Summary Judgment will be granted and the judgment of the  
21 administrative law judge reversed, and the Motion for Partial Remand will be denied.  
22

23 **I. MOTION FOR SUMMARY JUDGMENT**

24 **A. Background**

25 A.T. is an eight-year old autistic student who qualifies for special education under  
26 the Individuals with Disabilities Education Act (IDEA), 20 U.S.C. § 1400 *et seq.* The IDEA  
27 "seeks to ensure that 'all children with disabilities have available to them a free appropriate  
28 public education[.]' Under IDEA, school districts must create an 'individualized education

1 program' (IEP) for each disabled child.” *Schaffer v. Weast*, 546 U.S. 49, 51 (2005) (quoting  
2 20 U.S.C. § 1400(d)(1)(A)).

3 In the 2012–13 academic year, A.T. attended first grade at a school within Pointe  
4 Educational Services’ school district. His school developed an IEP, which included “goals  
5 and services in academics, speech and language, Occupational Therapy . . . and  
6 social/emotional/behavior supports.” Doc. 1-1 at 4; Doc. 41 at 11.

7 A.T. exhibited disruptive behavior during the academic year. The parties offer  
8 competing characterizations, but the behavior itself is undisputed: A.T. whined, cried,  
9 yelled, argued, disrupted class, was noncompliant, and walked into the wrong classrooms.  
10 *See* Doc. 34 at 2; Doc. 41 at 2–3. His most physically aggressive behavior involved  
11 “removing a teacher’s hand from his arm.” Doc. 1-1 at 6. His behavior problems  
12 culminated in a Manifestation Determination Review and IEP meeting in January 2013, in  
13 which his IEP team determined that A.T. “would benefit from placement in a private day  
14 school as the interventions implemented to address his behaviors have not been successful.”  
15 *Id.* The IEP team concluded that private day placement would address both behavioral and  
16 academic needs. *See* Doc. 34 at 3; Doc. 41 at 5.

17 Pointe selected the Austin Center for Exceptional Students (ACES) and provided  
18 written notice to A.T.’s parents on January 17, 2013. A.T.’s father responded the same day  
19 and expressed concern over the logistics of his son attending ACES. A.T.’s mother would  
20 be unable to pick up A.T. from ACES and A.T.’s brother from a different school, Gateway  
21 Academy, because of the release time at ACES. On January 21, Pointe informed A.T.’s  
22 father that placement decisions are based on services provided rather than schedules. *See*  
23 Doc. 34-1 at 61. The next day, A.T.’s father again emailed Pointe to express concern over  
24 whether the placement would meet A.T.’s IEP needs. He informed Pointe he would visit  
25 ACES, and he asked Pointe to consider and tour two other schools: Gateway Academy and  
26 New Way Learning Academy. *Id.* at 57. The IEP team met in early February to discuss  
27 placement at ACES, Gateway, and New Way. Pointe maintained its decision to send A.T.  
28 to ACES. Doc. 1-1 at 20.

1 Perceiving IDEA violations, A.T.'s parents filed a due process complaint. Among  
 2 other claims, they challenged Pointe's decision to place him at ACES. Because A.T.'s  
 3 family sought relief from Pointe's decision, they bore the burden of persuasion at the due  
 4 process hearing. *See Schaffer*, 546 U.S. at 51. An administrative law judge (ALJ) held a  
 5 two-day evidentiary hearing and invited post-hearing briefs. She subsequently issued a 21-  
 6 page order concluding, in relevant part, that Pointe violated the IDEA because placement at  
 7 ACES did not provide a "free appropriate public education" (FAPE) as required by 20  
 8 U.S.C. § 1400(d)(1)(A). The ALJ made explicit that she had "considered the entire record,  
 9 including the testimony and Exhibits," in finding facts and making conclusions of law, and  
 10 noted that she had "read and considered each admitted Exhibit, even if not mentioned in this  
 11 Decision. The Administrative Law Judge has also considered the testimony of every  
 12 witness, even if the witness is not specifically mentioned in this Decision." Doc. 1-1 at 4 &  
 13 n.5.

14 The ALJ reached the following conclusions regarding A.T.'s placement:

15 24. After the IEP Team determines the educational placement, the  
 16 school district may select the location at which the services will be provided.  
 17 "[C]hoosing which school the student will attend is an administrative  
 18 decision." [*Deer Valley Unified Sch. Dist. v. L.P.*, 942 F. Supp. 2d 880, 887  
 19 (D. Ariz. 2013)]. While it is an administrative decision, the location must still  
 20 be appropriate for Student in that it provides the individualized educational  
 21 services necessary to provide a FAPE to Student.

22 25. The Administrative Law Judge concludes ACES is not an  
 23 appropriate location because of the excessive transitions, the inclusion of  
 24 significantly older students for academic classes, and the severe behavior  
 25 issues prevalent in other students. At ACES, Student would be expected to  
 26 transition approximately half the day. More significantly, those transitions  
 27 would include students up to five years older than Student transitioning into  
 28 Student's academic classes. These significantly older students exhibit more  
 severe behavior issues than Student has been described as having including  
 physical aggression, sexual acting out, and drug issues.

26 26. Also of note was that ACES was at capacity at the time  
 27 Respondent Pointe proposed to enroll Student. Therefore, even if ACES had  
 28 been appropriate in terms of meeting Student's needs, ACES was not  
 appropriate at the time because it was not an available option.

1 *Id.* at 20–21 (footnote omitted). She then concluded Pointe must place A.T. at  
2 Gateway Academy.

3 27. The evidence submitted by Petitioners establishes that Gateway  
4 Academy is an appropriate location for Student. The classmates, curriculum,  
5 and structure are appropriate for him to make progress towards the IEP goals.  
6 Student would only be with other students his age. Its focus on autism  
7 spectrum students ensures that Gateway Academy can address Student’s  
8 behavioral and emotional needs. While there are transitions, there are fewer  
9 transitions and the transitions are used as teaching opportunities. Student  
10 attended Gateway Academy for a half day and was deemed eligible for  
11 admission by the staff.

12 28. Based on the IEP, the Administrative Law Judge Concludes the  
13 appropriate location is Gateway Academy.

14 *Id.* at 21.

## 15 **B. STANDARD OF REVIEW**

16 “A party aggrieved by the findings and decision of an ALJ in a due process hearing  
17 may seek review through a civil action in United States district court.” *L.M. v. Capistrano*  
18 *Unified Sch. Dist.*, 556 F.3d 900, 908 (9th Cir. 2009) (citing 20 U.S.C. § 1415(i)(2)).  
19 “Though the parties may call the procedure a ‘motion for summary judgment’ in order to  
20 obtain a calendar date from the district court’s case management clerk, the procedure is in  
21 substance an appeal from an administrative determination, not a summary judgment.”  
22 *Capistrano Unified Sch. Dist. v. Wartenberg*, 59 F.3d 884, 892 (9th Cir. 1995). The IDEA  
23 provides three specific instructions to reviewing district courts. They “(i) shall receive the  
24 records of the administrative proceedings; (ii) shall hear additional evidence at the request  
25 of a party; and (iii) basing its decision on the preponderance of the evidence, shall grant  
26 such relief as the court determines is appropriate.” 20 U.S.C. § 1415(i)(2)(C).

27 Notably, however, “judicial review in IDEA cases differs substantially from judicial  
28 review of other agency actions, in which courts generally are confined to the administrative  
record and are held to a highly deferential standard of review.” *Ojai Unified Sch. Dist. v.*  
*Jackson*, 4 F.3d 1467, 1471 (9th Cir. 1993). The Ninth Circuit has construed  
§ 1415(i)(2)(C) “as calling for de novo review of the state hearing officer’s findings and

conclusions,” but also as impliedly instructing district courts to give “due weight” to the administrative proceedings. *Ashland Sch. Dist. v. Parents of Student R.J.*, 588 F.3d 1004, 1008 (9th Cir. 2009). This requires giving “deference to the state hearing officer’s findings, particularly when they are thorough and careful, and avoid[ing] substituting its own notions of sound educational policy for those of the school authorities which it reviews.” *Id.* at 1008–09 (alterations, citations, and quotation marks omitted); *see also L.M.*, 556 F.3d at 908 (“A district court shall accord more deference to administrative agency findings that it considers thorough and careful.”) (quotation marks omitted). Ultimately, however, the Court “is free to determine independently how much weight to give the state hearing officer’s determinations.” *Ashland*, 588 F.3d at 1009.

### C. ANALYSIS

A.T.’s placement at ACES provides a FAPE—and thus satisfies the IDEA—if it “(1) addresses his unique needs, (2) provides adequate support services so he can take advantage of the educational opportunities and (3) is in accord with the individualized education program.” *Park v. Anaheim Union High Sch. Dist.*, 464 F.3d 1025, 1033 (9th Cir. 2006). Notably, a free *appropriate* public education “does not mean the absolutely best or potential-maximizing education for the individual child. The states are obliged to provide a basic floor of opportunity through a program individually designed to provide educational benefit to the handicapped child.” *Jackson*, 4 F.3d at 1474 (alterations and quotation marks omitted). The educational benefit must be “meaningful.” *N.B. v. Hellgate Elementary Sch. Dist.*, 541 F.3d 1202, 1212–13 (9th Cir. 2008) (“Under the 1997 amendments to the IDEA, a school must provide a student with a ‘meaningful benefit’ in order to satisfy the substantive requirements of the IDEA.”).

Pointe contends that the ALJ lost sight of her primary inquiry—whether ACES could provide a FAPE—and impermissibly compared ACES with Gateway Academy, the school she and A.T.’s parents perceived as superior. *See Gregory K. v. Longview Sch. Dist.*, 811 F.2d 1307, 1314 (9th Cir. 1987) (Review “must focus primarily on the District’s proposed

1 placement, not on the alternative that the family preferred. Even if the tutoring were better  
2 for Gregory than the District's proposed placement, that would not necessarily mean that the  
3 placement was inappropriate."). Although the ALJ did in fact conclude Gateway was a  
4 better placement, she began with the conclusion that ACES was *not* appropriate. The  
5 question is whether that conclusion was correct.

6 As the excerpted decision above reflects, the ALJ rejected ACES based on its  
7 excessive transitions, the inclusion of significantly older students for academic classes, and  
8 the severe behavior issues prevalent in other students. Finally, she concluded that in any  
9 event ACES could not provide a FAPE because it was at capacity when Pointe selected it.  
10 Pointe objects to each of these explanations. This case posed difficult challenges both to  
11 this Court and the ALJ. That Gateway Academy appears to be a better fit for A.T. quite  
12 reasonably affects evaluation of Pointe's placement. Despite the better fit, however, A.T.  
13 did not prove that ACES's perceived shortcomings precluded it from providing a FAPE.  
14 Because Pointe did not violate the IDEA, the decision below will be reversed.

15  
16 1. Transitions

17 A.T.'s IEP reflects challenges with transitions between classes. Although not a  
18 separate, explicit focus, the transition goal was "embedded in other things." Reporter's  
19 Transcript of Proceedings, April 2, 2013, at 114:23-24 [hereinafter "AR029, 4/2/2013"]; *see*  
20 *also id.* at 121:3-6, 123:17-23. Pointe believes the ACES approach to transitions provides a  
21 FAPE, and it makes two arguments in support.

22 First, most ACES students also struggle with transitions. Pointe offers testimony of  
23 Gay Hardy, school psychologist at ACES, that "90 percent of [ACES] kids have difficulty  
24 transitioning from class to class. That's just kind of a given with students who come to the  
25 ACES." Reporter's Transcript of Proceedings, April 1, 2013, at 26:9-11 [hereinafter  
26 "AR029, 4/1/2013"]. Second, ACES helps students manage transition problems. Pointe  
27 offers Hardy's testimony affirming that "ACES is designed to help students with  
28 [transitions]." *Id.* at 29:8-10. She elaborated, "The students, when they changes classes, are

1 taken in line with staff. So there's the teacher, teaching assistant, and behavior coaches  
2 escorting students to classes in a line." *Id.* at 29:10-13. Indeed, relying on the testimony of  
3 Katie Sprouls, a school psychologist "who contracts with Pointe to perform evaluations for  
4 its students" and who was added to A.T.'s IEP team just before Pointe selected ACES, Doc.  
5 42 at 3, 6, Pointe argues that ACES is appropriate *because* it confronts and works on  
6 transition issues rather than minimize them. Indeed, Sprouls testified that "for all skill  
7 development in the schools, especially students with special education needs, that you want  
8 to make sure you have your end all goal but have your small objectives of how you're going  
9 to build up to that. So if transitioning is the overall goal, then you're going to continue  
10 doing activities to increase ability their [sic] achieve that." AR029, 4/2/2013, at 102:23–  
11 103:4; *see also id.* at 103:5–14 (Sprouls affirming she would not "just leave [a student] in  
12 one classroom all day long" because he "has difficulty transitioning").

13 In contrast, A.T. offered testimony from Kim Yamamoto, who does not have  
14 academic training in special education but nonetheless has served as an advocate for  
15 students with special needs for 15 years. *See* AR029, 4/1/2013, at 177:3-13. A.T.'s parents  
16 hired Yamamoto in January 2013 to help them navigate the special education world. *See*  
17 AR029, 4/2/2013, at 25:18-20; AR029, 4/1/2013, at 177:24-25. After meeting with A.T.  
18 and his parents, familiarizing herself with his IEP, sitting in on IEP meetings, and visiting  
19 ACES with A.T.'s father, Yamamoto flagged the transitions at ACES as particularly  
20 alarming:

21 Having lots of transitions, he would transition for every academic period they  
22 said to where the other kids in the school were functioning at his academic  
23 level. So that would be reading; math; language arts, . . . ; and then back to  
24 his classroom for science, and then back out to another setting for the  
reflection time, the emotional reflection time that they have. They do that in  
combination so they transition to another class.

25 Transitions are the toughest things for kids with autism, and putting  
26 them through all those transitions was a red flag for me. You know, that is not  
27 something that you would do in an autism program. Or that is not something  
that would be typically set up.

28 AR029, 4/1/2013, at 196:18–197:7.

1 Confronted with conflicting evidence, the ALJ made the following findings to  
2 support her conclusion regarding transitions:

3 3. Student began exhibiting problem behaviors [in the fall of 2012]. These  
4 behaviors included . . . wandering into other classrooms during transitions.

5 . . . .  
6 22. The September 25, 2012, IEP included a notation that Student “has a sweet  
7 disposition and has a deep desire to please. . . . [He] often struggles with transitions (40% of  
8 the time).”

9 . . . .  
10 27. During the February 6, 2013, IEP meeting, Parent A.T. also requested that a  
11 goal addressing transitions be included in the IEP. While the IEP team agreed transitions  
12 were an issue for Student, as had been noted in the September 25, 2012, IEP, Petitioners’  
13 requested goal addressing transitions was not adopted.

14 . . . .  
15 33. For reading, writing, and math, Students at ACES spend “about half of the  
16 day . . . changing classes for those academic subjects.”

17 Doc. 1-1 at 5, 8, 9, 11. Although the ALJ “considered the testimony of every witness,” *id.*  
18 at 4 n.5, she did not make specific credibility determinations. She did not explicitly  
19 compare the testimony of Yamamoto to Sprouls and Hardy and explain why she  
20 presumably found the former more convincing than the latter two.

21 Nonetheless, the ALJ’s decision implicitly turned on favoring Yamamoto’s  
22 testimony. This was not reasonable. Both Yamamoto and Sprouls had very limited  
23 experience with A.T., particularly in the classroom. Sprouls testified she had never met  
24 A.T, spoken to his parents, *see* AR029, 4/2/2013, at 101:1-4, 105:12-13, or “issue[d] any  
25 kind of report on Student.” *Id.* at 113:15-17. Instead, she “came in entirely as an interpreter  
26 of evaluations.” *Id.* But similarly, Yamamoto testified she “really couldn’t judge on [the  
27 appropriateness of A.T.’s Statement of Behavior Plan] because I couldn’t see him in the  
28 classroom.”<sup>1</sup> AR029, 4/1/2013, at 186:2-3. She also conceded her “opinion of [A.T.] is  
very limited . . . .” *Id.* at 195:4. And aside from her experience as a student advocate,  
Yamamoto possesses no academic background in special education, school psychology, or a  
relevant field. Moreover, her concerns about ACES reflect global opinions about students

---

<sup>1</sup> Pointe refused to allow Ms. Yamamoto to observe A.T. in the classroom. *See* AR029, 4/1/2013, at 35:13-16.

1 with autism. *See id.* at 197:3-7 (“Transitions are the toughest things for kids with  
2 autism. . . . You know, that is not something that you would do in an autism program.”).  
3 Although the value of Yamamoto’s testimony derives from her familiarity with A.T.’s  
4 unique needs, her testimony on this point does not reflect such particularized knowledge.

5 The question of whether the ACES approach to transitions would accord with A.T.’s  
6 IEP may be the kind of “educational policy” election the district court should be careful not  
7 to second guess. *Cf. Gregory K.*, 811 F.2d at 1314 (“The ‘due weight’ that courts must give  
8 to the state education agency’s findings on matters of educational policy should prompt  
9 courts in the future to provide a more thorough explanation when reversing an agency’s  
10 ruling on the appropriateness of a special education placement.”). But Arizona employs a  
11 central panel of administrative law judges utilized by various state agencies. *See* A.R.S.  
12 § 41-1092.01. The practice promotes neutrality, but it trades off with agency expertise.  
13 This in turn decreases the institutional competency gap between the Court and the ALJ, and  
14 thus the extent to which concerns about institutional competency motivate deference to her  
15 findings on matters of educational policy.

16 Moreover, the due weight afforded an ALJ decision varies with the thoroughness of  
17 analysis. *See Wartenberg*, 59 F.3d at 891 (“When exercising its discretion to determine  
18 what weight to give the hearing officer’s findings, one criterion we have found useful is to  
19 examine the thoroughness of those findings. The amount of deference accorded the hearing  
20 officer’s findings increases where they are thorough and careful.”) (quotation marks  
21 omitted). Aside from noting A.T.’s struggles with transitions and reciting the amount of  
22 transitioning at ACES, the ALJ did not undertake any analysis of why the ACES approach  
23 is not appropriate as Hardy and Sprouls testified. Hardy testified that ACES serves many  
24 students who struggle with transitions and that the school provides the support system  
25 necessary to help students overcome those challenges. Moreover, Sprouls testified that this  
26 approach promotes skill development. Notably, the ALJ’s conclusion that Gateway  
27 Academy would provide a FAPE turned in part on finding that its fewer transitions “are  
28 used as teaching opportunities.” Doc. 1-1 at 21. But beyond the difference in volume, the

1 ALJ did not explain why ACES's instructive approach to transitions failed to meet A.T.'s  
2 needs where Gateway's succeeded.

3 With only limited testimony that the ACES approach to transitions would not  
4 address A.T.'s unique needs—and contrary testimony that the approach is pedagogically  
5 sound—A.T. did not meet his burden to demonstrate by a preponderance of the evidence  
6 that the ACES approach would not provide the meaningful benefit the IDEA requires.

7  
8 2. Older students in classes

9 The ALJ determined that the ACES transitions would inappropriately bring students  
10 up to five grade levels ahead of A.T. into half of his classes. The presence of older students  
11 in A.T.'s academic classes partly motivated her conclusion that ACES would not provide a  
12 FAPE. She made the following finding in support:

13 32. Typically, ACES classes “have at least two grade levels  
14 together, no more than three.” Therefore, kindergarten and first grade  
15 students may be in a class together with some second grade students, third  
16 and fourth grade students may be in a class together, and fifth and sixth grade  
17 students may be in a class together. However, for the academic subjects of  
18 reading, math, and writing, students are grouped according to ability.  
Therefore, a sixth grade student who cannot read may be in a class with  
kindergarten and first grade students of the same reading level.

19 *Id.* at 10–11 (footnotes omitted).

20 The ALJ relied on Hardy's testimony: All ACES classes have “at least two grade  
21 levels together, no more than three. So [the] elementary kindergarten kids you might have  
22 kindergarten, first and maybe some second. Then we have second/third, third/fourth,  
23 fourth/fifth.” AR029, 4/1/2013, at 18:14-17. Hardy testified that A.T. could be in a  
24 classroom with sixth graders possessing similar academic skills—who read at his level, for  
25 example—and that, in fact, ACES educated one sixth grader who fit that description when  
26 Pointe selected it. *See id.* at 25:5-21, 28:15–29:4. Similarly, Sprouls testified that schools  
27 commonly mix students of varying ages with similar academic skills. For example, it  
28 would be appropriate to place A.T. in a class with older students when working on reading  
skills. *See* AR029, 4/2/2013, at 103:15–104:8. She noted, “if you have an eighth grader

1 reading at a first grade level and you have a third grader reading at a first grade level and  
2 you have activities that are appropriate for that skill set in that age range then that's actually  
3 a fairly common practice you would see in schools." *Id.* at 104:21-25. Although Sprouls  
4 testified that it would not be appropriate to place first and sixth grade students together if  
5 "you're working on behavior" or "to develop say social skills business social skills," *id.* at  
6 104:9-11, 104:17-20, she noted that "when it's academic skills . . . there's a lot of schools  
7 actually that do ability level and skill level as opposed to age level." *Id.* at 117:9-11.

8 A.T. argues primarily that because all ACES students have behavioral challenges,  
9 and because Sprouls testified that grouping by skill level rather than age is inappropriate  
10 when targeting behavior and social skills, the mixed-age academic classes involve de facto  
11 social skill building and thus are inappropriate.

12 As an initial matter, little evidence supports A.T.'s concern that younger students and  
13 older students are regularly educated together. Hardy testified that there was one sixth  
14 grade student with delayed reading skills who could be in A.T.'s class, but there is no  
15 evidence of other, older students in need of remedial academic skills. The ALJ's conclusion  
16 that A.T.'s classes would include "significantly older students"—plural—appears to rest on  
17 Hardy speculating that such inclusion would be *possible*. Doc. 1-1 at 20. Additionally, no  
18 specific evidence supports A.T.'s speculation that "ACES has to be working on behavior  
19 issues even during academics" because ACES students have behavior challenges. Doc. 40  
20 at 9. A.T. has not proffered any testimony demonstrating, for example, that academic  
21 classes routinely devolve into lessons on behavior or social skills. In the absence of any  
22 such evidence, A.T. has not demonstrated that the potential for mix-aged classrooms fails to  
23 "(1) address[] his unique needs, (2) provide[] adequate support services so he can take  
24 advantage of the educational opportunities [or] (3) . . . accord with the individualized  
25 education program." *Park v. Anaheim Union High Sch. Dist.*, 464 F.3d 1025, 1033 (9th Cir.  
26 2006). Indeed, the ALJ did not explain how the inclusion of older students, even if likely,  
27 would suffice to deny a meaningful educational benefit. A.T.'s speculation is insufficient to  
28 show that mixed-age classes preclude ACES from offering a FAPE.

3. More serious behavioral issues

The ALJ also expressed concern with the “severe behavior issues prevalent in other students” at ACES. Doc. 1-1 at 20. Indeed, her concern about A.T.’s exposure to older students reflected her conclusion that “[t]hese significantly older students exhibit more severe behavior issues than Student has been described as having including physical aggression, sexual acting out, and drug issues.” *Id.* The ALJ made three specific findings to support these conclusions:

28. Gay Hardy, School Psychologist at ACES, testified regarding the student body, curriculum, and staff at ACES. According to Ms. Hardy, ACES is a school that “deals with students with significant behavior concerns” and “the students who come to ACES are having difficulty managing their behavior in a public school setting, lots of anger management, impulse control, that kind of thing.” ACES “work[s] hard on helping our kids develop strategies and coping skills to deal with those issues.”

29. Ms. Hardy acknowledged that the students who come to ACES “have serious issues.”

30. ACES has students who have been suspended or expelled from public schools for weapons violations, acting out sexually, and drugs.

*Id.* at 10 (footnotes omitted).

Hardy’s testimony elaborates: ACES educates “some students who have been long-term suspended from public schools because they had a pocketknife in their pocket, that kind of thing,” some students who have been suspended for “some sexual acting out,” and some students who have been suspended for drugs. AR029, 4/1/2013, at 24:5–25:4. Hardy testified that ACES “typically” does not see severe behavior once the students acclimate to the school (after transferring from public schools) and that ACES is in fact a “very safe place.” *Id.* at 20:5-13. Pointe proffers Hardy’s testimony that ACES separates its younger students from the behavior of its middle and high school students by educating them in different parts of the building. *See id.* at 17:21-25. Still, this does not shield students like A.T. from the more severe behavior of his cohorts or any older elementary school students who may transition into his academic skills classes.

1 Consistent with this testimony and the ALJ's findings, Yamamoto testified that she  
2 had placed "lots of different kids" at ACES: "kids who are sexual offenders, kids who have  
3 physically acting out behaviors, kids who have extreme school phobia, lots of different  
4 emotional behavioral issues that are not necessarily handled in the public school system."  
5 *Id.* at 194:17-21. Yamamoto testified that none of the students she had placed at ACES  
6 paralleled A.T. in terms of disability and behavior. *Id.* at 194:22-24. Similarly, Faith Thaw,  
7 an independent contractor and student advocate hired by Pointe to ensure compliance with  
8 special education law, testified that Pointe "tend[s] to use ACES when we have children  
9 with severe behavior problems." *Id.* at 115:1-3.

10 Pointe offers evidence that many ACES students display behavior similar to A.T.  
11 ACES students begin as "externalizers" who scream, cry, and fail to regulate their behavior.  
12 Doc. 33 at 10–11 (quoting Hardy). But Hardy also testified, and Pointe does not contradict,  
13 that ACES students hit, kick, and throw objects. *See* AR029, 4/1/2013, at 19:17-22.  
14 Although Pointe emphasizes that A.T.'s IEP had been recently modified to address  
15 escalating behavior, *see, e.g.*, Doc. 42 at 8 ("[T]he ALJ failed to appreciate Student's  
16 significant behavioral issues that he manifested around the time of the IEP."), there is no  
17 evidence that his behavior included hitting or kicking, let alone drug use or sexual conduct.  
18 For example, A.T.'s September 2012 IEP sets the following goal: A.T. "will gain attention  
19 from others (both staff and students) using positive strategies only (doing well on his work,  
20 being positive with classmates when in groups) and refrain from gaining attention using  
21 negative approaches (calling out at inappropriate times, pouting) with others at a mastery  
22 rate of 80% starting at a baseline of 50%." Doc. 34-1 at 24. Similarly, the November 2012  
23 addendum to A.T.'s IEP focusing on behavior identifies intervention strategies for "non-  
24 compliance to direction, say[ing] no, crying, yelling, arguing, aggressive in nature  
25 behavior." *Id.* at 33. A.T.'s behavior simply did not rise to the level prevalent at ACES.

26 The question then is whether a school that serves students who enter with more  
27 serious behavioral challenges can also adequately address A.T.'s IEP-identified needs. *See*  
28 *Park*, 464 F.3d at 1033. Although the ALJ expressed concern about other students'

1 behavior, she did not explain how those behaviors would preclude ACES from offering  
2 A.T. a FAPE.

3 The evidence supports the contrary. Hardy testified that students who come to  
4 ACES have “difficulty managing their behavior in a public school setting, lots of anger  
5 management, impulse control, that kind of thing. So we work hard on helping our kids  
6 develop strategies and coping skills to deal with those issues.” AR029, 4/1/2013, at 17:9-  
7 13. In addition, ACES offers a “Jump Start” program specifically for students in the autism  
8 spectrum. *Id.* at 18:3-5. Hardy testified that each classroom includes “a certified special ed  
9 teacher, [a] teaching assistant, and a behavior coach. We also have behavior coaches  
10 monitoring hallways at all times.” *Id.* at 19:2-8. According to Hardy, these approaches  
11 work. Students display fewer behavioral outbursts as they acclimate to ACES, and the  
12 school returns approximately 20–25 percent of its students to the general educational  
13 environment each year. *See id.* at 21:8-14.

14 Moreover, ACES serves students who scream, cry, and display physical aggression.  
15 Likewise, the evidence demonstrates A.T. yelled, cried, and demonstrated behavior that was  
16 “aggressive in nature.” Doc. 34-1 at 33. Because ACES serves students who display some  
17 behavior similar to A.T.—in addition to students who display more serious behavior—and  
18 because it has a program designed specifically for students with autism, it has the capacity  
19 and experience to serve the behavioral needs reflected in A.T.’s IEP. As a result, A.T. has  
20 not met his burden to show ACES cannot provide a meaningful educational benefit with  
21 respect to his behavior notwithstanding that it also serves students with more severe  
22 behavioral problems.

#### 23 24 4. Availability

25 Finally, the ALJ concluded that even if the ACES curriculum and pedagogy  
26 provided a FAPE, it had no room for A.T. when Pointe selected the placement. She based  
27 this conclusion on Hardy’s testimony. A.T.’s parents toured ACES on January 23. At that  
28 time the class A.T. would join—the kindergarten through second grade classroom—

1 included fourteen children, its maximum capacity. *See* AR029, 4/1/2013, at 23:2-6. Hardy  
2 testified that ACES had hired a new teacher who began in January and that this new teacher  
3 completed her three-to-four week training period and opened her own classroom for A.T.'s  
4 age group "probably the week after" the tour. *Id.* at 23:6-11.

5 Contrary to A.T.'s assertion, that ACES did not have space the day A.T.'s family  
6 toured does not necessarily make it inappropriate, so long as sufficient information about  
7 the future setting is available to evaluate fit. *See Fuhrmann v. E. Hanover Bd. of Educ.*, 993  
8 F.2d 1031, 1039 (3d Cir. 1993). In *Fuhrmann*, the Third Circuit upheld a student placement  
9 despite the parents' protests that the program's newness precluded observation; it thus could  
10 not be "reasonably calculated to meet [the student's] individual needs." *Id.* at 1038. The  
11 court disagreed:

12 The fact that the Jointure program was in its inception when East  
13 Hanover recommended placement there does not make that placement  
14 inappropriate. G.F.'s acceptance at Jointure was unconditional. At the time  
15 of the administrative hearing, Jointure had already accepted four students for  
the 1990-91 school year, ranging in age from five to eight and exhibiting  
approximately the same level of autistic-like behavior as G.F.

16 *Id.* at 1039 (citation omitted).

17 Similarly, an Arizona administrative law judge quoted *Fuhrmann* in a 2004 decision  
18 rejecting a district's proposed placement. There, the administrative law judge reached the  
19 following conclusion:

20 That the teacher and aide were not hired, nor were the students  
21 selected for the school program by the August, 2004 IEP meeting does not  
22 automatically preclude it from being a placement which provides FAPE for  
23 this child. At any time during the school year a teacher, or an aide or both  
may need to be replaced. A class may start a few days late or may start with a  
substitute, and FAPE may still be provided.

24 *Phoenix Elementary Sch. Dist.*, 105 LRP 56677, at 12 (2004) (alterations omitted) (Doc. 40-  
25 1). Like the Third Circuit, the Arizona administrative law judge evaluated appropriateness  
26 based on what the district knew at the time of placement:

27 Since the teacher, aide and actual class composition at the school were  
28 unavailable to the IEP team participants, the determination of whether the  
placement provided FAPE is based on what was known at that time. The

1 class size was anticipated to be 20. The percentage of native English speakers  
 2 was anticipated to be 20 to 25% or 4 to 5 students. The remainder of the class  
 3 composition would be children who spoke only or primarily Spanish. The  
 4 teacher and was [sic] anticipated to be bilingual, certified but not in special  
 5 education and was not anticipated to have any particular training in working  
 6 with children with speech language deficits. The regular class aide was  
 7 anticipated to be bilingual. The full time speech aide was anticipated to have  
 8 a two year certificate. It was anticipated that there would be a great deal of  
 Spanish spoken in the classroom, particularly among the students. The  
 physical setting was known to be a large classroom with multiple activity  
 stations all in use at the same time.

9 *Id.* at 12–13.

10 Thus, in *Fuhrmann* and the Arizona administrative decision, the adjudicators looked  
 11 to those aspects they knew about the nascent programs, such as the number of students, the  
 12 students' abilities, and the faculty's qualifications. Courts in this circuit have looked to the  
 13 same factors when evaluating the appropriateness of extant settings. *See Union Sch. Dist. v.*  
 14 *Smith*, 15 F.3d 1519, 1525 (9th Cir. 1994) (inappropriate to place autistic child in setting  
 15 with "no other autistic children" and where "there was no evidence that the teacher had been  
 16 trained to work with autistic children"); *Deer Valley Unified Sch. Dist. v. L.P.*, 942 F. Supp.  
 17 2d 880, 886–87 (D. Ariz. 2013) (inappropriate to place autistic child with IEP-designated  
 18 communication goals in a classroom "with non-verbal peers with whom he cannot  
 19 communicate verbally").

20 A.T. argues ACES was inappropriate when Pointe offered it because the number of  
 21 students in his eventual class was unknown. Pointe responds that the parties knew the  
 22 following when it selected ACES: the school had 14 students in its kindergarten–second  
 23 grade class, and it had hired a teacher in January who began about one week after A.T.'s  
 24 visit.<sup>2</sup> Pointe deduces that A.T.'s class thus would have served seven or eight students and,

---

25  
 26  
 27 <sup>2</sup> This is only partially correct. Hardy knew ACES hired a new teacher in January  
 28 and testified that new teachers interned for "three or four weeks" before opening a class.  
 AR029, 4/1/2013, at 23:9-10. But at the time A.T.'s family toured ACES, Hardy testified  
 she did not know the timeline for opening the new class. *See id.* at 23:12 (Hardy  
 testifying that at the time of the tour she "really did not know that time line").

1 like its other classes, would have included three staff members: a certified special education  
2 teacher, a teaching assistant, and a behavior coach.

3       Pointe's position is more persuasive. First, the ALJ was not precluded from looking  
4 to the nascent classroom to evaluate its appropriateness. *See Fuhrmann*, 993 F.2d at 1039;  
5 *see also E.M. v. Pajaro Valley Unified Sch. Dist.*, 652 F.3d 999, 1006 (9th Cir. 2011) ("It is  
6 true that we have said that actions of the school systems . . . cannot be judged exclusively in  
7 hindsight. But that exclusive use of hindsight is forbidden does not preclude consideration  
8 of subsequent events.") (citations and quotation marks omitted). Second, A.T. did not show  
9 that its newness precluded meaningful evaluation for fit. A.T. offered no evidence, for  
10 example, to contradict the reasonable inference Pointe draws from the school's student  
11 composition or to suggest that the pedagogy in the new class (and the qualifications of its  
12 instructors) would differ in any meaningful way from its current kindergarten-second grade  
13 class. Because ACES could adequately provide a meaningful educational benefit to A.T.,  
14 the mere fact his class would not have been ready for a week (or two) does not render it an  
15 inappropriate placement. Neither the law nor the evidence supports the ALJ's finding on  
16 this issue.

## 17 18       5.     Conclusion

19       Both the ALJ and this Court were presented with a close case, which was made more  
20 difficult by the perception that ACES was less attractive than Gateway Academy.  
21 Testimony elicited from A.T.'s father reinforced this perception. He recounted a visit to  
22 ACES:

23               Bars on the outside of the school bent in. To me it looked like the  
24 last stop before you go to prison, kids up against the wall like they're ready to  
25 be patted down by a policeman, with their -- I think they call them minders  
26 but really they're their bodyguards in case the kid lashes out to prevent any  
27 physical harm. But yeah, both times actually kids were outside up against the  
28 wall, being talked to, things like that.

      So that's -- to me in listening to [Hardy]'s description, we talked about  
the different types of kids that come to this school. And when I listened to the  
description of some of the types of kids that go to ACES, that's not my son.

1 My son does not do that stuff. And I'm just like, as a parent, aside from  
2 transitions and the reading program and the class size and all of other things, I  
3 just -- my gut told me this is not the right place. This is not where he belongs.

4 AR029, 4/2/2013, at 59:10-25. The Court is sympathetic both to A.T.'s preference and the  
5 ALJ's difficult decision. But the IDEA—and not a parent's gut—supplies the standard by  
6 which a placement decision is reviewed. Pointe's decision to send A.T. to ACES  
7 disappointed his parents but did not violate the law. Summary judgment will be granted to  
8 Pointe and the ALJ's decision reversed.

## 9 **II. MOTION TO REMAND**

### 10 **A. Procedural Background**

11 On December 13, 2013, before Pointe filed the pending Motion for Summary  
12 Judgment, the Court remanded this case to the ALJ to clarify her decision regarding tuition  
13 and transportation costs. In the course of the subsequent January 2014 proceedings, Pointe  
14 learned A.T.'s parents had applied for and received funds from the Arizona Empowerment  
15 Scholarship Account (ESA) in 2013. Arizona established the ESA fund "to provide options  
16 for the education of students in this state." A.R.S. § 15-2402(A). Essentially, the ESA  
17 program enables parents of students with disabilities to finance some private school  
18 education expenses with state funds.

19 In summer 2013, A.T.'s parents withdrew him from his Pointe school pending  
20 resolution of the due process hearing and enrolled him at Gateway Academy as a private  
21 student using ESA funds. By statute, receipt of ESA funds "release[s] the school district  
22 from all obligations to educate the qualified student." *Id.* § 15-2402(B)(2). According to  
23 Pointe, A.T.'s July 2013 receipt of ESA funds discharged its obligation to provide a FAPE.  
24 Following the January proceedings, Pointe moved the ALJ to reconsider her decision  
25 regarding placement in light of the ESA issue. She declined, concluding that her August  
26 2013 order constituted a final decision under state law, that the January proceedings and  
27 decision served only to clarify that order, and that she lacked jurisdiction to adjudicate the  
28

1 substance of Pointe's motion for reconsideration. Pointe filed the pending Motion for  
2 Partial Remand (Doc. 39) to press its claim to the ALJ in the first instance.

3  
4 **B. Analysis**

5 A.R.S. §15-2402(B)(2) releases the school district from its obligation to educate a  
6 student receiving ESA funds. But Pointe overstates the effect of this release. The statute  
7 requires only that "students not simultaneously enroll in a public school while receiving  
8 ESA funds." *Niehaus v. Huppenthal*, 233 Ariz. 195, 201, 310 P.3d 983, 989 (App. 2013),  
9 *review denied*, (Mar. 21, 2014). Pointe's obligation is discharged while A.T. receives ESA  
10 funds, but it is triggered again once A.T. stops receiving them. *See id.* ("[T]he public school  
11 is obligated to accept a child that has terminated the ESA contract just as the public school  
12 would be obligated to accept any other child."). Because "the ESA does not require a  
13 permanent or irrevocable forfeiture of the right to a free public education," *id.*, it does not  
14 work a permanent or irrevocable discharge of Pointe's duty to A.T. Thus, A.T.'s receipt of  
15 ESA funds for some disputed period in 2013 does not permanently release Pointe of its  
16 obligation to provide a FAPE.

17 Contrary to Pointe's assertion, the ESA issue does not dispose of the inquiry above.  
18 Nonetheless, because the Court will reverse the administrative decision on the merits, it will  
19 deny the motion for partial remand so that Pointe can "address the ESA Issue in a separate  
20 state administrative proceeding," Doc. 46 at 1 n.1, as it suggests.

21 IT IS THEREFORE ORDERED granting Pointe Educational Services' Motion for  
22 Summary Judgment (Doc. 33).

23 IT IS FURTHER ORDERED denying Pointe's Motion for Partial Remand of  
24 Certain Issues (Doc. 39).
